

EuroMicrophH

Acidic Fridays

Goal

This discussion series is intended to stimulate an exchange on the different aspects of how microorganisms react to low pH conditions and why people are interested to investigate this subject. Having a regular meeting for the COST action will facilitate communication between COST members and new members of the action. We can use this platform to attract new members and connect to other initiatives.

Topics

The topics shall fit to the overall goal of this action “understanding and exploitation of the responses of micro-organisms to low pH”, but can and shall reflect the high diversity of the action.

It is a possibility to present new papers, new ideas, new projects, current research topics (stress response, microbiomes, antibiotic resistances, co-cultivations, biofilms, climate change, COVID etc...).

1st Acidic Friday 2020-12-18 16:00 CET (online)

Please register for this meeting [here](#).

You can access the Zoom link for the meeting via [the website after login](#).

Agenda

Chairs

- Oded Liran, MIGAL Galilee Research Institute, Israel
- Merve Atasoy, KTH Royal Institute of Technology in Stockholm, Sweden

16:00 Welcome

16:05 Matthias Steiger, TU Wien, Austria

Introduction to the Acidic Fridays, Concept and Idea

16:25 Conor o`Byrne, NUI Galway, Ireland

Understanding How Microorganisms Respond to Acid pH Is Central to Their Control and Successful Exploitation, <https://doi.org/10.3389/fmicb.2020.556140>

16:40 Questions and Discussion

17:00 End
